VERTICAL BUCKY STAND TYPE S-15

VARIMEX

R-2081 — Floor model S-15-1

R-2082 — Wall mounted model S-15-2

Vertical Bucky Stand S-15 — used as a part of any type of X-ray installation — gives possibility to perform radiographs of all internal organs in any required position of the patient's body.

The S-15 is composed of a column (mobile stand or wall fixed according to the model) and movable plate with Bucky diaphragm. The system of spring counter-balance enables easy movements of the plate and its fastening in any required position. The Bucky diaphragm type DZ-110 with motor driven grid enables radiography in a wide range of exposure time.

Accessories: X-ray protection apron, cassette holder, head clamps, back rest, hanger for accessories, compression belt.

SPECIFICATION

— Mains supply		220 V — 50 c/s
— Bucky grid		15:1, 28 lam/cm, FFA 100
— Height of the column		1900 mm
— Height of the diaphragm centre		max. 1860 mm min. 380 mm
— Tilting of the diaphragm		forwards 30° backwards 90° left (stepwise) 5°, 90°, 180° right (stepwise) 5°, 10°, 90°, 180°
— Weight:	S-15-1	net 178 kg gross 200 kg
	S-15-2	net 120 kg gross 200 kg
— Cubature:	S-15-1	1.7 m ³
	S-15-2	1.6 m ³
