MINI-MAX TYPE Z-13 APPARATUS FOR GENERAL ANAESTHESIA

VARIMEX

MINI — weight and overall dimensions

MAX — possibility of anaesthesia

MINI-MAX is an apparatus performing the anaesthesia in the open, half-open, half-closed and closed system

MINI-MAX comprises the following units:

- cart,
- dosing unit with breathing pressure manometer, output and ventilator connectors, aspiration and by-pass O_2O push-buttons,
- set of the flow meters for O_2 and N_2O ,
- graduated halothane vaporizer HALOFIX,
- container for soda lime absorber,
- oxygen failure warning device,
- aspirator with container for secretion,
- cylinders (10 l) for O_2 and N_2O ,
- tray for monitors,
- container for catheters,
- stop-watch,
- drip rod,
- stand for syringes,
- earthing,
- full set of accessories for any anaesthesia system.

TECHNICAL DATA

— Oxygen flow:	0 — 2 l/min
	2 — 15 l/min
— N_2O flow	1 — 10 l/min
— Safety pressure valve	0 — 40 cm H_2O stepwise or closed
— Capacity of soda lime container	2,7 l
— Halothane concentration	0,3 — 4 Vol % stepwise
— Weight (without cylinders)	40 kg
— Weight (with cylinders)	80 kg
— Weight gross	170 kg
— Cubature	0,7 m ³

ADDITIONAL EQUIPMENT (on request)

Universal Lung Ventilator RELOG P — ANEST—1 type G-20 Cat. No. OP-55
